Lundsteen is Assistant Dean for Career and Professional Development and Assistant Professor of Psychiatry at the Graduate School of Biomedical Sciences at The University of Texas Southwestern Medical Center (UTSW), where she oversees career resources and programs for graduate students and postdoctoral scholars. Lundsteen has also advised graduate students, postdocs and alumni at MIT, Oxford University and Stanford University. Her research interests are in workplace learning and the development of professional expertise. She is a regular PhD career advice contributor to Inside Higher Ed’s Carpe Careers blog, and co-author of ReSearch: A Career Guide for Scientists, published by Elsevier in June 2017.

Job-seeking and career exploration are demanding tasks, but utilizing your science PhD skill set can help you stay positive and purposeful during the stressful ups and downs of a career search. This session will provide you with resources and strategies for keeping a confident career focus and show you how a conscientious and optimistic job search plan can make all the difference.
