Hoping to become a better scientific editor? All GSBS students and UTHealth or MD Anderson postdoctoral fellows with proficient editing skills are invited to join the GSBS Editing Group! The group's goal is to provide editing support to students and postdocs by reviewing scientific related documents such as abstracts, research proposals and scientific manuscripts. This meeting will serve as an introduction to these services and more. Skilled scientific editors and those looking to improve their editing skills are encouraged to attend!

This informal meeting is open to all GSBS students. Lunch will be provided and no registration required. **If you are interested and unable to attend, please email to MDA.UTH.GSBS.scientificediting@gmail.com**
