Postdoctoral Research Fellows- Heart and Vascular Research Center

Postdoctoral fellowships are available in the Heart and Vascular Research Center at UTHealth McGovern Medical School in the Texas Medical Center. Research at the Center is focused on identifying vascular disease genes and studying vascular disease mechanisms and treatments in cell culture, iPSCs, and mouse and zebrafish models of disease. The research environment is fast paced and highly collaborative and productive. Candidates should have excellent communication skills, expertise in genetics, cell and molecular biology or animal models of disease, and be highly motivated for an independent career in biomedical research. A recent PhD or MD/PhD in a related discipline is required. Salary is commensurate with experience. For full consideration please submit a cover letter with a brief description of research experience, recent CV and the names of three references.

UTHealth McGovern Medical School, which is located in the Texas Medical Center, is one of six UTHealth – Houston schools. There are close academic and research ties with other leading academic institutions such as Baylor College of Medicine and Rice University.

Requirements:

- PhD or MD/PhD in related field
- Experience in molecular genetics/cell biology/cell and animal models of disease

Applications including CV and statement of interest should be sent to:
Hariyadarshi.Pannu@uth.tmc.edu
