## Results of the Defense of the Ph.D. Dissertation

The purpose of the defense is to provide a consistent and complete evaluation of the dissertation and the student's understanding of the research, as well as the student's ability to report information to the scientific community in a well-organized and interesting form.

The defense consists of two parts: a public seminar and an examination. In the public seminar, the student will deliver a 45 to 60 minute public presentation, including a detailed description of the background, rationale, materials and methods, results and conclusions appropriate to the research. Following the presentation, the student will respond to questions from the audience.

Immediately thereafter, and at a location announced at the end of the seminar, the Advisory Committee will examine the student on the dissertation. Any member of the GSBS Faculty who attends the public presentation may participate in the examination to the extent described below. Others wishing to attend must be approved by the Advisory Committee.

The student's Advisor will serve as moderator of the examination. The student will be expected to respond to questions from those attending on any aspect of the written dissertation or the material presented at the seminar.

After the defense, the student will meet privately with the Advisory Committee to discuss the results. Finally, the Advisory Committee (in executive session, if desired) will determine what recommendation to make to the Dean and the Academic Standards Committee.

**The Committee may conclude that the student has passed, or it may require additional research, modifications to the dissertation, and/or another defense.**

Following the defense, the results of this meeting will be communicated through the Office of Academic Affairs to the Dean and the Academic Standards Committee for their information and approval.

Within one week of the defense, any GSBS faculty member who has read the student's dissertation and has attended the defense may write directly to the Dean to provide an evaluation of the student's performance. In reaching a final decision on whether to award the Ph.D. or require further work and/or another defense, the Dean will take into consideration the recommendation of the Advisory Committee and other comments received from GSBS Faculty. In particular cases, the Dean may solicit additional evaluations of the dissertation from experts in the field either within or outside the GSBS Faculty.

The decision of the Dean will be communicated to the student and the Advisory Committee within one month of the defense.

Graduate School of Biomedical Sciences  
Results of the Defense of the Ph.D. Dissertation**

*This form is to be submitted to the Office of Academic Affairs within two weeks after the Ph.D. defense.*

We, the undersigned, as the Advisory Committee in charge of the Defense of the Ph.D. Dissertation for

\_\_\_\_\_ (student's name),

report that we have examined the candidate on his/her dissertation research on \_\_\_\_\_ (date).  
(Please check the boxes that apply.)

- We recommend that the candidate be granted the Doctor of Philosophy degree.** If the Committee has attached any conditions to the recommendation, e.g., requiring that the dissertation be rewritten, the signing of the dissertation by the Committee members indicates the conditions have been met.
  
- The Advisory Committee is satisfied with the evaluation of the student's dissertation by Turnitin.**
  
- The Advisory Committee agrees that the candidate understands and has acted appropriately on ethical issues related to the dissertation project.**
  
- The Advisory Committee attests that the student contributed substantially to the text of any previously published work incorporated into the dissertation.**
  
- The Advisory Committee attests that any figure taken from the student's publication(s) and used in the dissertation is the result of work done by the student, him/herself.**
  
- The student has a first-author publication submitted [for students who entered prior to Fall 2014] or in press/published (for students who entered GSBS Fall 2014 and beyond).**
  
- We do not recommend that the candidate be granted the Doctor of Philosophy degree at this time.** [Please attach a letter to indicate the reason(s) for this decision.]

*(Please type each committee member's name and degree(s) under the signature line.)*

## Selection of Areas of Research Concentration for PhD GSBS Diplomas

GSBS students may elect, with the approval of their Advisory Committee and the Program Director(s), to have one or two Areas of Research Concentration (ARC) displayed on their diploma. For students graduating after the summer semester of 2019, the inclusion of a Secondary ARC is possible only if the student previously submitted a Request for Secondary ARC which was approved and is on file with the GSBS. The signature(s) of the Program Director(s) is/are required in order to list Program ARCs on the diploma. Approval is denoted by their signatures.

I wish to include  one or  two ARCs on my diploma.

Current Primary ARC 1 Affiliation (your program):	Indicate Secondary ARC: (check one only)
<input type="checkbox"/> Biochemistry and Cell Biology <input type="checkbox"/> Biochemistry and Molecular Biology <input type="checkbox"/> Biostatistics, Bioinformatics and Systems Biology <input type="checkbox"/> Cancer Biology <input type="checkbox"/> Cell and Regulatory Biology <input type="checkbox"/> Clinical and Translational Sciences <input type="checkbox"/> Epigenetics & Molecular Carcinogenesis <input type="checkbox"/> Experimental Therapeutics <input type="checkbox"/> Genes and Development <input type="checkbox"/> Genetics and Epigenetics <input type="checkbox"/> Human and Molecular Genetics <input type="checkbox"/> Immunology <input type="checkbox"/> Medical Physics <input type="checkbox"/> Microbiology and Infectious Diseases <input type="checkbox"/> Microbiology and Molecular Genetics <input type="checkbox"/> Neuroscience <input type="checkbox"/> Quantitative Sciences <input type="checkbox"/> Therapeutics and Pharmacology	<input type="checkbox"/> Biochemistry and Cell Biology <input type="checkbox"/> Cancer Biology <input type="checkbox"/> Genetics and Epigenetics <input type="checkbox"/> Immunology <input type="checkbox"/> Medical Physics <input type="checkbox"/> Microbiology and Infectious Diseases <input type="checkbox"/> Neuroscience <input type="checkbox"/> Quantitative Sciences <input type="checkbox"/> Therapeutics and Pharmacology
