Dear all,

The neuroscience program retreat was a tremendous success! I would like to extend my sincere gratitude to the student council, Amanda, and all the students and faculty who participated. All student presentations were top-notch, and the judges had a difficult time in picking clear winners, which explains why we had many ties. Congratulations to all the students who won prizes for their presentation! And for those who did not win, I hope that this experience was still valuable.

The semester is now in full swing. We recently kicked-off the work-in progress seminars. This year, we will also be inviting faculty to present at this venue. It should be an excellent opportunity for everyone to hear about what the faculty and students of the program are doing in their labs. I encourage all of you to attend. Our co-director, Dr. Rodrigo Morales, will be leading this effort — many thanks to him for getting this all together!
